

How To Use:

Fun Faces of Wisconsin Agriculture

Lesson Plan Activities:

Complete instructions are listed for each lesson, including a list of necessary materials, discussion questions, and related activities. Lesson content can be increased or decreased as appropriate for the age and grade level. Some lessons can be presented as a demonstration rather than a group hands-on activity. Most lessons have worksheet masters designed as student consumables. These worksheets may be used as homework, quizzes, or individual assignments.

Related Activities:

Several lessons in this collection include a variety of suggestions that may be suitable for class activities, small group projects, or extra-credit assignments. Activities may stimulate ideas for additional teacher demonstrations or individual student exploration. Website listings offer teachers access to additional resources, lesson plans and background information. Many websites also offer student pages and activities.

For More Information:

Questions, comments, or permission requests for other uses may be directed to the Agriculture in the Classroom Coordinator, Wisconsin Farm Bureau Federation, 1241 John Q Hammons Drive, Madison, WI 53717, (608) 828-5719 or darneson.fbcenter@wfbf.com.
